

Advancements in Seafood Transport Packaging

Reusable Plastic Containers

VS.

Foam Containers

<p>✓ Reusable – can be used again and again for over a decade</p>	 <p>Sustainability</p>	<p>Single-use, expensive to recycle, takes centuries to decompose</p> <p>✗</p>
<p>✓ Cost-effective, driving significant packaging savings</p>	 <p>Packaging Price</p>	<p>Up to 3x more expensive than RPCs</p> <p>✗</p>
<p>✓ Folds to 1.5" tall, opening up valuable warehouse space</p>	 <p>Container Size</p>	<p>Tall and bulky, taking up needed space in your warehouse</p> <p>✗</p>
<p>✓ Maintain cold temperature to keep seafood quality throughout the supply chain</p>	 <p>Cold Chain</p>	<p>Maintain cold temperature to keep seafood quality throughout the supply chain</p> <p>✓</p>
<p>✓ Made of strong, food-grade polypropylene</p>	 <p>Durability</p>	<p>Breaks apart, introducing foreign material onto product</p> <p>✗</p>

Improve the way you ship seafood by eliminating foam containers. When you switch to Reusable Plastic Containers, you protect the environment and improve your bottom line.
