

Pooling: The simplest path to reusables

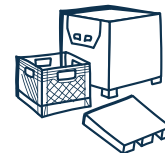

The nation's most rigid food safety program

Right asset, right place, right time

Zero asset maintenance

Robust, high-quality portfolio

Zero capital outlay

Guaranteed food safety

- ISO 22000:2005 certified
- ISO TS 22002-4 certified
- Annual 3rd party surveillance audits

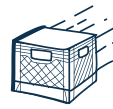

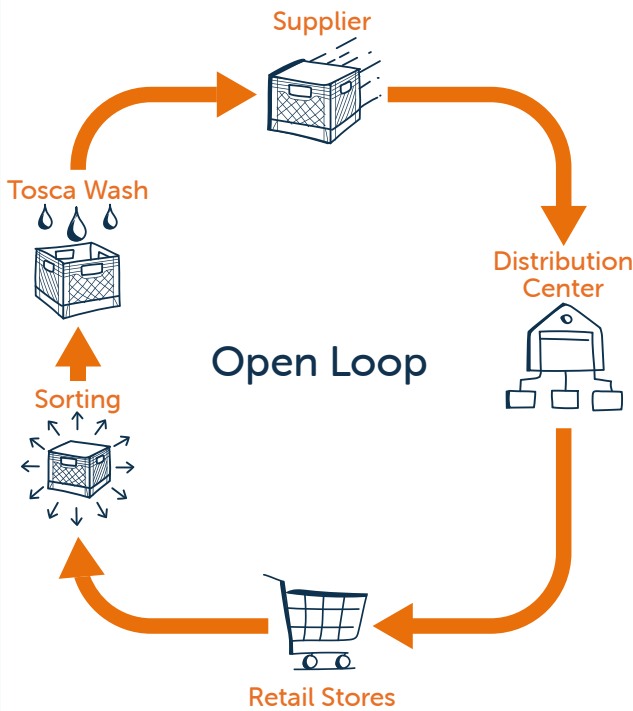

Surety of supply, everytime

- Merchandising has easy supplier flexibility
- Forecasts go into Tosca's demand planning & network optimization algorithm
- Rolling forecast is refined daily
- Forecast adjustments made for seasonality and spikes in volume with proactive planning
- Days-on-hand at customer sites is closely monitored.
- Routing is optimized
- Orders and deliveries are tracked in the Tosca Hub

How pooling works

Pooling is a circular economy system where a “pool” of reusable assets are shared by multiple businesses. Assets are delivered to suppliers based on demand forecasts/customer needs, then returned from retailers to be cleaned, serviced and returned to the pool for re-use.

Delivery of assets to the supplier

Clean Tosca reusables are delivered when and where they're needed.

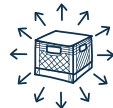

Assets shipped to the distribution center

Reusable assets are loaded and transported to the distribution center, where they're palletized and shipped for retail stores

Assets delivered to retail stores

Reusables are unloaded or in the case of retail-ready assets, placed directly at the point of sale in the store.

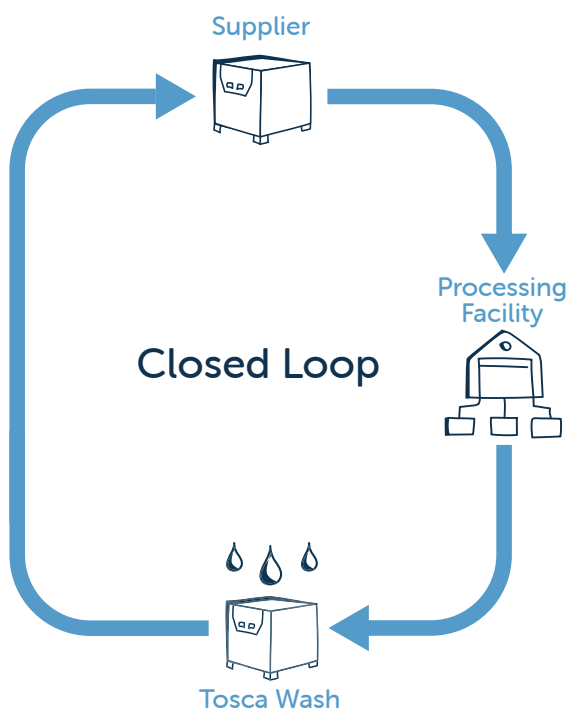

Assets are sorted (as needed)

Reusables are transported to the salvage sorting center, where they're sorted for return.

Washing at a Tosca service center

Reusables are inspected, repaired if necessary, and washed under the most rigorous food safety program.

Supplier delivery

Tosca reusables are delivered to you—when and where they're needed.

Assets shipped to processing facility

The reusables are loaded with goods and shipped to the manufacturing facility, where they'll be packaged, processed, or converted.

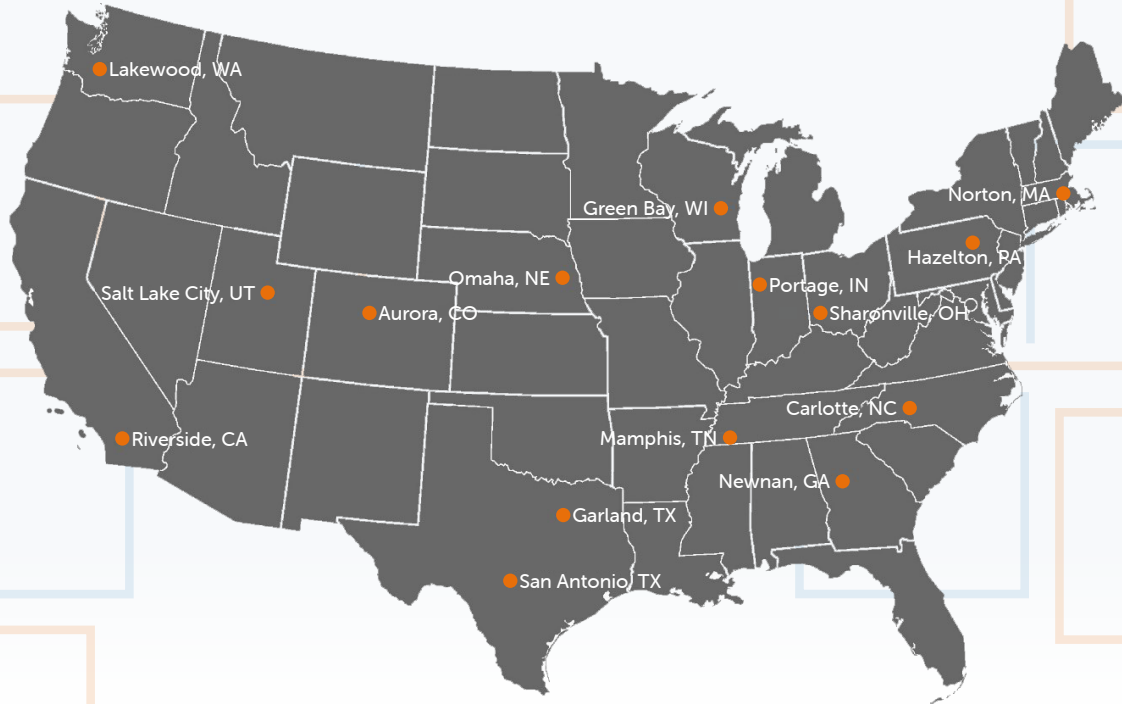

Washing at a Tosca service center

Assets are inspected, repaired if necessary, and washed under the most rigorous food safety program.

Largest product portfolio and service center network in the U.S.

Our service centers are strategically located to ensure supply availability with reduced transportation time and CO₂ emissions at every turn.

and additional centers across the globe

Switching to reusables is made **easy** with Tosca

Tosca has led the evolution of the reusables industry for more than 60 years by providing bespoke solutions that drive savings and sustainability impact with minimal lift from our partners.
