

## Built for the Challenges of Shipping Poultry

The industry's first Reusable Plastic Container (RPC) custom built for poultry and specially designed to handle the realities of shipping. Tosca understands the complexities of the poultry supply chain and we have put our years of experience into developing a far superior alternative to conventional corrugated boxes.

### Durable

RPCs bear the weight so the product inside doesn't have to. Better protection equals less damage and food waste.

### Sustainable

Eliminate single-use materials from your supply chain with a reusable packaging solution.

### Creates Labor Savings

The strength of the container reduces box failures, resulting in less mess to clean up.

## Features and specifications

### Interlocked Stacking

Creates greater pallet load stability during transport

**Enhanced Ventilation**  
Reduces cooling time

### Fluid Retention

Fluid retention channels in the RPC capture liquid, protecting product and packaging from poultry purge
