

# H1 1208 Euro

## Size Food Grade

### Pallet

The H1, a food grade virgin HDPE pallet, is the most commonly used plastic euro-size hygiene pallet in Europe. This durable and versatile pallet can be used across many industries. Its 3 runners make it easy to handle while closed blocks enable the pallet to be used in highly automated environments. Rims on the upper deck allow for the safe stacking of empty pallets and securing the load on the pallet.

#### Hygienic

Plastic pallets are non-porous and resistant to moisture, insects, fungi, acids, fats, solvents and odor. Our pallets are inspected after every turn to make sure they meet our quality standards.

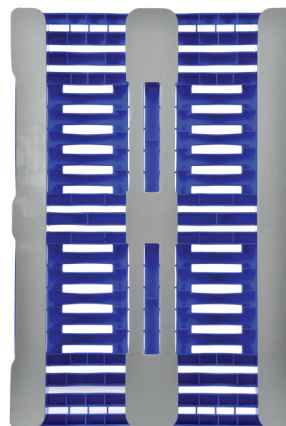

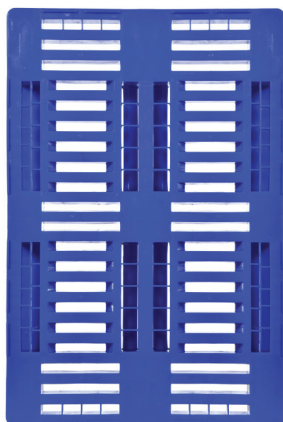

#### Sustainable

Ultra-durable pallets can be reused for years and outlast wood alternatives. At the end of their lifecycle, they get recycled and remanufactured into new pallets.

#### Built for Automation

Because plastic pallets are molded, the sizes and weight are always consistent, causing zero disturbances in your automated material handling systems.

# Features and specifications

---

## Characteristics

Colour	Blue
Runners	3 closed
Rims	Yes - 7 mm
Anti-slip	No
Metal re-inforced	No
Material	HDPE
Foodgrade	Yes
ISPM-15 proof	Yes
Temperature range	-30°C/+40°C

## Dimensions

External	1200 x 800 x 160 mm
Weight	18 kg

## Loading capacity

Max static load	5.000 kg
Max dynamic load	1.250 kg
Max in rack load	1.000 kg

## Loading quantities

Units per trailer	495 units
Stack	15 units
