Members

Safe packaging means that the packaging is safe for anyone handling that packaging or for people using the products contained within the packaging.

Food Safe
Ergonomic
Hand and Finger safe

**Tosca reusable assets are
food safe, ergonomically
designed and eliminate the
need for box cutters!**

Eliminate your safety concerns with RTPs

Tosca's RTPs are safe for consumers, customers and users.

For example: Our customers say their workforce prefers to use our RPCs over corrugated boxes as they are easier to lift, less likely to fall apart, don't need cutters to open or to collapse the empty boxes and are easier to stack without fear of falling.

80%

reduction in hand and finger injuries

100%

Of Tosca RPCs are sanitized

ZERO

Splinters, nails or staples

FOOD SAFE

Food grade plastic

100%

Ergonomically designed

Lower costs of H&S injuries

Less time lost due to incidents

*Happier workforce = more productive
workforce*

*Peace of mind regarding consumer
health exposure*

Benefits of RPTs **On Total Cost of** **Packaging**

H&S incidents are an element of the TCOP which is often overlooked.

Our 2030 Goals

Health and Safety

- Continuously strive to maintain **injury frequency rates below industry benchmarks**
